

THE H-H-M TL-15 SERIES OFFERS THE KIND OF PROTECTION YOU NEED PLUS THE CONVENIENCE YOU WANT . . .

EASIER ACCESS

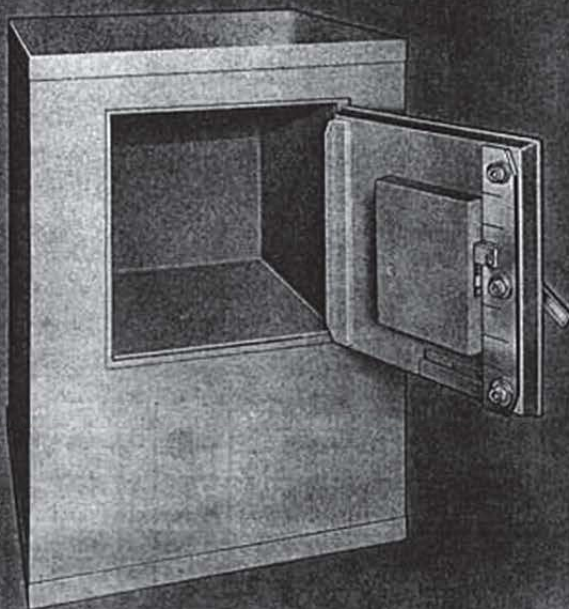

Square door design provides greater convenience and easier accessibility for storing and retrieving bulky items like register tills.

FULL LENGTH LOCKING BAR

The full height locking bar in these safes provides locking action based on the same principle used in massive bank vault doors.

LABELED SECURITY

The labels on the Herring-Hall-Marvin TL-15 series indicate that these safes have successfully passed testing at the Underwriters' Laboratories.

H-H-M TL-15 ENCASED SERIES

The encased Square Door TL-15 Safe with its added weight of steelclad concrete increases security while offering a working height that is often found to be more convenient. The additional weight can serve as a deterrent to those who would remove safe from premises. An anchoring bar in the base permits the user to securely attach safe to premises.

Model No.	DIMENSIONS						Cubic Cap.	Door Opening Clear.	Approx. Shpg. Weight
	Inside			Outside					
	High	Wide	Deep	High	Wide	Deep
